EKO Wall Systems Ltd

❖ *Our company profile*

EKO Wall Systems Ltd is one of the well recognized companies in the field of Cement Stucco and Exterior Insulation & Finish Systems (EIFS) Applications, in the Province of Alberta. Over the years our applicators have been trusted for their vast experience in the application of EIFS and Conventional Cement Stucco Systems, combined with our ability to provide quality service on projects ranging from high rise residential and mixed use buildings, commercial and retail buildings, institutional facilities and low rise residential buildings. Furthermore, our company specializes in re-cladding buildings with fatigued and deteriorated building envelopes.

❖ *Our services*

EKO Wall Systems Ltd is an installer of EIFS & Conventional Stucco Systems as well as Decorative Architectural Mouldings. Our work is carried out in an economic, safe, energy efficient, versatile and innovative method. We are authorized to apply products manufactured by all well known EIFS & Conventional Cement Stucco Products Manufacturers.

EKO Wall Systems Ltd

❖ *Our Standard*

For many years our work has stood for remarkable quality, durability, safety, innovation and timely completion. Our highest priority is to provide lasting, reliable and innovative cladding solutions to our customer base, whether their project is new or retrofit. We have acquired this knowledge through our long lasting reputation for quality and commitment to the EIFS industry and we continue to improve with the growing industry needs. We regard every detail and specification of each project as a challenge to our workmanship and ensure that we surpass the expectations of our clients. EKO Wall Systems Ltd is a company based on the ideal of superior customer service and quality installations. We are proud of our Team whose effort and dedication continues to shine in the construction industry.

EKO Wall Systems Ltd

❖ *Our projects*

Shopping Malls & Retail Centers

- EKO Wall Systems Ltd has worked with many developers and designers to provide architectural design and aesthetic appearance to neighborhood malls & marketplaces. We have completed many retail buildings whose brand names are very recognizable in the construction industry.

Hotels & Residential Suites

- EKO Wall Systems Ltd provides a unique combination of craftsmanship and technology to provide aesthetics to your buildings which create long lasting impression. We very proud to have worked with esteemed names in the hotel and accommodation business. Our team works closely with clients to ensure best quality and problem-free applications throughout the construction process.

Institutional & Long Term Care Facilities

- From new construction to retrofit. EKO Wall Systems Ltd has a wide range of EIFS and Cement Stucco solutions to meet the design requirements of both designers and local building codes. We specialize in commercial type buildings and we are experts in the application of a variety of different types of related cladding options to satisfy even the most stringent requirements. EKO Wall Systems Ltd is expert in providing alternatives to conventional exterior finishes like brick or stone yet as durable and reliable as any other system.

Residential Custom Homes

- In the area of Residential Custom Homes, EKO Wall Systems Ltd ensures the provision of the most suitable design to meet both the customer's needs as well as budget requirements without compromising quality. We specialize in the application of EIFS and Cement Stucco for Custom Homes and coupled with our expertise in the installation our Architectural Mouldings, we can transform an ordinary looking house into a work of art.
